September 08, 2020.

Dear VCI Parents/Guardians:

All parents/guardians are asked to screen their child(ren) for COVID-19 Symptoms prior to sending them to school daily. The purpose of the Parent Screening tool is to help parents and guardians make decisions about whether or not their child/children can attend school. This tool should be completed daily before attending school. No personal information is requested when completing the tool, which means that a child/children cannot be personally identified or linked to the responses. Using this tool is voluntary. It is recommended that parents/guardians contact healthcare provider if there are further questions about a child/children's health. This tool is subject to change as further guidance from the Ministry of Health and evidence related to COVID-19 risks becomes available.

The Parent COVID-19 screening tool developed from Public Health has been launched and posted on Lanark, Leeds and Grenville and Eastern Ontario Public Health sites. UCDSB Communications department has also posted the links below on the UCDSB website and will be communicating the links via My Family Room to families and shared through social media.
